CONTENTS

Professor J.Th.G. Overbeek.....vii

Particle flocculation by adsorbing polymers
E. Dickinson (Leeds, United Kingdom) and L. Eriksson (Stockholm, Sweden)....1

Monolayers and planar or curved bilayers
G. Gabrielli (Florence, Italy).....31

Wetting films
A.M. Cazabat (Paris, France).....73

General thermodynamics of the diffuse double layer
D.G. Hall (Bebington, United Kingdom).....89

Characterization of UF membranes. Membrane characteristics and characterization techniques
F.P. Cuperus and C.A. Smolders (Enschede, The Netherlands).....135

On marginal regeneration
H.N. Stein (Eindhoven, The Netherlands).....173

Measurement of the interaction between adsorbed polymer layers: The steric effect
P.F. Luckham (London, United Kingdom).....191

On the conversion of experimental electrokinetic data into double layer characteristics in solid-liquid interfaces
R. Hidalgo-Alvarez (Granada, Spain).....217

Insoluble monolayers of weakly ionising low molar mass materials and their deposition to form Langmuir-Blodgett multilayers
B.P. Binks (Hull, United Kingdom).....343

Ionic surfactants with divalent counterions
H. Wennerström, A. Khan and B. Lindman (Lund, Sweden).....433

Small angle neutron scattering investigation of rodlike micelles aligned by shear flow
J. Penfold (Chilton, United Kingdom), E. Staples and P.G. Cummins (Bebington, United Kingdom).....451

Adsorption of ions, polyelectrolytes and proteins
M.A. Cohen Stuart, G.J. Fleer, J. Lyklema, W. Norde and J.M.H.M. Scheutjens (Wageningen, The Netherlands).....477

The effect of uniaxial stress on the swelling of n-butylammonium vermiculite
R.J. Crawford, M.V. Smalley and R.K. Thomas (Oxford, United Kingdom).....537

Wetting of stratified solids
F. Brochard-Wyart, P.G. de Gennes and H. Hervet (Paris, France).....561

Microemulsions - interfacial aspects
D. Langevin (Paris, France).....583
